Showcases

At Holland Circular Hotspot we aim to share our innovations, knowledge and experiences, as well as inspire international entrepreneurs and knowledge institutions with successful circular initiatives. We have gathered more than 100 cases of Dutch circular practices.

Find the latest additions directly below, pick a theme or use the search window.

We will be adding new cases on a regular basis. Dutch showcases can be submitted [here](#).

Clariter – a solution to the global plastic waste epidemic

Clariter is a global cleantech company that produces green sustainable petrochemicals upcycled from plastic waste. These alternatives to fossil-based products can be used in over a thousands industrial and consumer applications and help industries created circularity in their value chain.

Clariter is a pioneer in the chemical recycling field. When it began developing its technology in 2003, Clariter was one of the first companies to identify the commercial potential of plastic waste. In 2006, the company expanded its research lab into a R&D plant, and in 2018 built its first international industrial demo plant in South Africa.
